

SHAIMAA DWEDAR

Computer Engineering Graduate — Software Engineer | Full-Stack Developer | AI & Embedded Systems

Ramallah, Palestine • shaimaadwedard03@gmail.com • +972 59 460 8763 • github.com/Shaimaa-22 • linkedin.com/in/shaimaadwedar-a31561335

PROFILE

Computer Engineering graduate (Al-Quds University, 2026) with hands-on experience building full-stack applications, backend services, APIs, and embedded-connected systems. Comfortable working in shared codebases, documenting decisions for teammates, and turning feedback into concrete improvements. Looking to grow into a professional Software Engineer through a structured, mentored internship.

TECHNICAL SKILLS

Languages: JavaScript, Python, Dart, C, C++, PHP

Backend & APIs: Node.js, Express.js, REST APIs, JWT, PostgreSQL, SQL, Firebase

Tools: Git, GitHub, Vercel, Render, Cloudinary, Agile/Scrum

Software Engineering: OOP, Data Structures & Algorithms, Clean Architecture, SOLID Principles

Frontend & Mobile: HTML5, CSS3, Flutter, Bootstrap, Tailwind CSS

AI / ML: Applied ML, recommendation logic, chatbot integration, Whisper API

Embedded / IoT: ESP32, Arduino, MQTT, sensor/actuator integration

EXPERIENCE

Software Development Trainee — Dimensions Info-tech, Ramallah, Palestine

2025

- Built cross-platform mobile features in Flutter/Dart within an existing MVVM codebase, documenting logic for a multi-developer team
- Applied SOLID principles and clean-code conventions; communicated implementation decisions with teammates
- Implemented offline-first data persistence with PostgreSQL and integrated the Whisper API for speech-to-text input
- Used structured logging and clear documentation to trace bugs and shorten team debugging cycles

Freelance Software & IoT Engineer — Self-employed

2025 – Present

- Developed a web-based control interface for an industrial inverter over MQTT
- Designed hardware/control electronics for a sugar-processing machine plus a real-time monitoring website
- Built a bilingual (Arabic/English) corporate website with a structured client-inquiry workflow

PROJECTS

Pizza Go — Smart Ordering System with Embedded Automation

Graduation Project

- Designed and implemented a full-stack ordering platform with a scalable backend architecture, including REST APIs, authentication, database design, and complete order lifecycle management
- Developed real-time communication between the web application and an ESP32-based automated preparation unit using MQTT for device control and status updates
- Integrated secure online payments using Stripe and deployed the system using Vercel and Render, ensuring a complete production-ready workflow

CV Evaluation Pipeline — ML-Based Resume Scoring

- Built an ML pipeline (Python, PyTorch, BERT) served via FastAPI to evaluate and score resumes

IdeasTracker — AI-Assisted Idea Management Platform

- Cross-platform app (Flutter, PostgreSQL) with offline-first sync, an AI suggestion engine, and Whisper-based voice capture

Where Should I Go? — Mood-Based Recommendation Platform

- Combined the Google Places API with geolocation for real-time, context-aware recommendations

EDUCATION

B.Sc. in Computer Engineering, Al-Quds University, Palestine

2021 – 2026

Relevant coursework: Software Engineering, Database Systems, Web Development, Mobile Application Development, Artificial Intelligence, Embedded Systems & IoT, Computer Networks

CERTIFICATIONS & TRAINING

- Front-End Developer Nanodegree — Udacity

LANGUAGES

Arabic: Native

English: Professional working proficiency
