

# SHAIMAA DWEDAR

Computer Engineer | Full-Stack Developer | Mobile App Developer | AI & IoT Enthusiast  
shaimaadwedar03@gmail.com | linkedin.com/in/shaimaa-dwedar-a31561335 | github.com/Shaimaa-22

## PROFESSIONAL SUMMARY

---

Computer Engineer and Software Developer with experience in full-stack web development, mobile application development, AI integration, and IoT systems. Skilled in Flutter, Dart, JavaScript, Node.js, PostgreSQL, and modern cloud technologies. Passionate about building scalable software solutions, integrating intelligent features, and creating seamless user experiences through innovative and user-centered applications

## EXPERIENCE

---

### Software Development Trainee – Dimensions Info-tech, Ramallah 2025

- Developed and maintained cross-platform mobile applications using Flutter and Dart.
- Implemented MVVM architecture to separate UI and business logic, ensuring scalability.
- Applied SOLID principles and clean code practices for maintainable projects.
- Integrated PostgreSQL and offline-first databases for local data persistence.
- Added AI-powered Speech-to-Text features using the Whisper API for voice input.
- Built a real-time commenting system to enhance interactivity.
- Utilized logging tools for debugging and performance optimization.
- Delivered multilingual support (Arabic and English) with offline functionality.

## FEATURED PROJECTS

---

### Pizza Go – Smart Pizza Ordering & Automated Preparation System (Graduation Project)

- Developed a full-stack pizza ordering platform using HTML, CSS, JavaScript, Node.js, Express.js, and PostgreSQL.
- Integrated Stripe payment processing and secure user authentication.
- Implemented real-time order tracking and status synchronization.
- Connected the platform with an ESP32-based automated pizza preparation system using MQTT communication.
- Designed database architecture and RESTful APIs.
- Deployed the system using Vercel and Render.

### IdeasTracker – AI-Powered Idea Management Platform

- Developed mobile and web applications using Flutter and PostgreSQL.
- Integrated AI-powered idea suggestions and chatbot assistance.
- Implemented Speech-to-Text functionality for voice-based idea capture.
- Built offline-first synchronization and real-time collaboration features.

### Where Should I Go? – Mood-Based Recommendation Platform

- Developed a web application that recommends nearby places based on user mood and preferences.
- Integrated Google Places API and browser geolocation services.
- Added AI-powered recommendation capabilities.
- Designed a responsive and user-friendly interface.

## EDUCATION

---

Bachelor of Science (B.Sc.) in Computer Engineering  
Al-Quds University – Palestine

Graduated: June 2026

Relevant Coursework:

- Software Engineering
- Database Systems
- Web Development
- Mobile Application Development
- Artificial Intelligence
- Embedded Systems & IoT
- Computer Networks

### CERTIFICATIONS & TRAINING

- Software Development Training – Dimensions Info-tech, Ramallah (2025)
- Front-End Developer Nanodegree – Udacity
- Python & Machine Learning – The Hope International

## SKILLS

---

### TECHNICAL SKILLS

- Programming Languages: JavaScript, Dart, Python, C, C++, PHP
- Frontend: HTML5, CSS3, Flutter, Bootstrap, Tailwind CSS
- Backend: Node.js, Express.js, REST APIs, JWT Authentication
- Databases: PostgreSQL, SQL, Firebase (Realtime Database & Firestore)
- AI & IoT: AI Chatbots, Whisper API, Speech-to-Text, MQTT, ESP32
- Software Engineering: MVVM, SOLID Principles, Clean Code, Responsive Design, Offline-First Applications
- Tools & Platforms: Git, GitHub, Vercel, Render, Cloudinary, Agile Methodology

### SOFT SKILLS

- Problem Solving • Teamwork • Communication • Leadership • Time Management • Fast Learner • Adaptability
